PROFILE INFO

A globally decorated, adaptable, and entrepreneurial individual with a proven foundation in competitive academics and emerging technologies. Awarded a World Scholar's Cup Medalist and a Bronze Medal in the NASA Olympiad, demonstrating exceptional intellectual rigor and problem-solving skills. Possesses a deep interest in Artificial Intelligence and Cybersecurity, reinforced by practical technical experience, including the development of a university-level code script for targeted job title identification. Complementing technical aptitude is a strategic, entrepreneurial outlook, underpinned by formal training in non-technical marketing and a clear ambition to launch a startup.

Culturally fluent and highly resilient, with extensive international living experience (5 years in Yangon) and solo travel exposure across diverse regions (Punjab, Vietnam, Thailand, Canada). Excellent communication and critical thinking skills, honed through a passionate engagement in debate. Multilingual with proficiency in Spanish (A1) and basic knowledge of Italian and French, reflecting a commitment to continuous learning. Furthermore, demonstrates a strong dedication to community welfare as an active blood donor.
